

gabas? mandy? blues? green? subbies? vallies? gear? coke?

**The RADAR Drugs Early Warning System is working with the
Scottish Ambulance Service to update drug information
for emergency call handlers.**

This work includes creating a drug A-Z to help call handlers assess drug-related incidents and optimise response. All outputs will be publicly available on our webpage along with links to drug resources. To ensure the A-Z is current and credible we have created a survey to identify key terms used to describe different drug types.

**Please complete this survey and share widely with people in your
networks - it should only take 5 minutes.**

Deadline: 31st of August 2022

Take the Drugs A-Z survey:

<https://surveys.publichealthscotland.scot/221786>

Working collaboratively to rapidly detect, assess
and respond to threats of drug-related harms.
